

Safety Options from General Services-

FLOORING: Secure and firm footing is essential for safety:

- 12 x 12 interlocking anti-microbial PVC tiles which resist mold and mildew for tubs/showers. Because the tiles have “little feet” air flow is permitted to circulate under the non-slip floor mat which permits evaporation.
- Adhesive backed Tread strips and Bath mats.
- Low pile carpets, Laminate floors, and vinyl plank flooring.

LIGHTING:

- Sufficient lighting is essential for safety! Simple modifications can enhance your sense of security and comfort!

We can help you select the best options available. Our maintenance teams are trained professionals with the experience and knowledge necessary to accurately install your equipment while keeping your well-being in mind.

Please give **Robin Chasnov a call 215-443-3873**- I will assist you with everything you need to be safe, and comfortable while keeping your home visually appealing!
